

BEECOIN WHITEPAPER

Innovative Ecosystem Play-To-Earn

DISCLAIMER

This white paper is for informational purposes only and does not constitute investment advice or an offer. **BeeCoin** makes no commitment to profitability or token price stability and assumes no responsibility for potential losses. Users should enter investments with full awareness and thorough investigation.

ABSTRACT

As a leading project, **BeeCoin** aims to create a play-to-earn environment combined with innovative and attractive financial tools. This platform provides a blend of gaming features, rewards, and blockchain-based capabilities, allowing users to enjoy a unique play-and-earn experience. The **BeeCoin** token, the core of this ecosystem, plays a significant role in user interactions and various activities within the bot and associated programs.

INTRODUCTION

With the growth and development of blockchain technology and cryptocurrencies, new opportunities for value creation and innovative interactions have emerged. BeeCoin strives to harness these technologies, offering a dynamic and engaging environment for its users to enjoy the gaming experience and a variety of in-bot services while achieving potential earnings.

FQS PROJECT

The FQS project acts as the primary supporter and driving force behind the **BeeCoin** project, providing essential resources and infrastructure for establishing **BeeCoin** as a successful platform within the crypto ecosystem. Through strategic partnerships, technical expertise, and user acquisition support, FQS helps **BeeCoin** expand rapidly and introduce new features to attract a broader audience. Furthermore, FQS's commitment to integrating advanced blockchain solutions enables **BeeCoin** to leverage the highest level of security, speed, and scalability available, creating a dynamic and user-friendly environment for players, investors, and partners.

Community Focus

BeeCoin has developed an ecosystem based on the priorities and preferences of its user community, focused on feedback and needs. This project allows users to easily and user-friendly participate in its activities and gain considerable added value.

Proposal

BeeCoin offers numerous opportunities for users to earn income through its play-to-earn games, special lotteries, daily tasks, and other in-bot activities. Additionally, after the **BeeCoin** token launch, users can use the token to purchase special items, participate in exclusive events, and promote their social media channels.

Project Phasing and Development Plan

Phase 1: Initial Development(Month 1)

Market Analysis and Needs Assessment:

Evaluation of relevant markets for Telegram bots and BeeCoin's target users.

Bot Design and Development:

Initial bot structure with user registration capabilities, game introductions, and reward systems.

Testing and Initial Feedback:

Beta testing and collecting user feedback to improve the user experience.

Phase 2: Enhancements and Feature Additions (Month 1–4)

Increasing Attractive Features:

Adding diverse games, daily cards, and reward systems.

Influencer Partnerships:

Attracting new users through partnerships with reputable influencers.

UI/UX Improvement:

Enhancing appearance and user experience for better engagement.

Phase 3: BeeCoin Token Launch(Month 4–7)

Token Creation:

Planning to create the **BeeCoin** token on a suitable blockchain (such as TON or Binance Smart Chain).

Establishing the BeeCoin Economic Ecosystem: Defining various uses of the token, including in-bot payments and special item purchases.

Exchange Listing and Airdrop: Listing the token on reputable exchanges and implementing incentive programs for token distribution.

Phase 4: Post-Token Launch Development(Month 7–10)

Token Integration with Bot Sections: Enabling the use of tokens for social media promotion and card purchases.

Introducing Competitions and Challenges: Holding competitions with attractive prizes to increase user engagement.

Phase 5: Long-Term Development(Month 10 and Beyond)

Collaboration with Leading DApps:

Enabling the use of **BeeCoin** in decentralized applications to expand the ecosystem.

Expansion to International Markets:

Marketing to attract global users and continuous development.

Token Buyback and Burning: Optimizing the token supply for greater value stability.

Tokenomics

BeeCoin uses a fair and reasonable distribution model:

- **Token Supply:** 21,000,000
- **Network:** TON

Distribution Model:

To enhance the value of the BeeCoin token and support our loyal users, we have meticulously designed a token distribution plan. This model is structured to increase the token's value over time as user activity grows, making investments more sustainable and valuable. **We have established this framework to foster a positive upward trend in price and provide a genuine incentive for both users and investors to continue on the journey with BeeCoin.**

Pre-Sale: 20%

5% will be allocated for a private pre-sale exclusive to **FQS holders**.
15% will be offered in the public pre-sale.

Airdrop, Phase1: 30%

This allocation includes 30% of the tokens designated for participants in the first airdrop phase.

Team and Project Development: 20%

5% will go to the core team.

15% will be reserved for project development and expansion.

Tokens in this category will be **locked** for **varying periods** to ensure team commitment and long-term stability.

BeeCoin Mining over 4 Years: 10%

Mining of BeeCoin tokens will be distributed as follows over a four-year period:

Year 1: 5% of the total BeeCoin tokens will be distributed.

Year 2: 2.5%, which is half of the previous year's distribution.

Year 3: 1.25%, half of the second year.

Year 4: the remaining 1.25%.

Staking Rewards: 5%

Staking rewards will be provided to users in BeeCoin for major cryptocurrencies.

Final Airdrop and Game-Based Rewards: 15%

15% of the tokens will be **locked** until the end of the second airdrop phase, which will involve exciting activities within the Bee World game. These tokens will be distributed to users at the end of the final airdrop.

Motivation

The motivation behind the **BeeCoin** project is to create a sustainable and engaging ecosystem where users can benefit from blockchain technology while enjoying an interactive and enjoyable experience. **BeeCoin** understands that users seek more than traditional games or simple earning models—they desire community, rewards, and innovation. At **BeeCoin**, we aim to create an interactive experience that includes elements of play-to-earn, token-based rewards, and blockchain capabilities. This ecosystem is designed to reward users through various activities, including games, daily tasks, and lotteries, providing a user-centric and collaborative experience.

BeeCoin's motivation is built on understanding the growing needs of the digital community. With increasing interest in decentralized finance and blockchain games, **BeeCoin** bridges the gap between these two, allowing users to earn income and perform digital transactions in a familiar and attractive environment. By introducing exciting earning opportunities, our goal is to encourage greater user participation, support platform growth, and provide real value to users.

Commitments

Our commitments at **BeeCoin** are based on transparency, user satisfaction, and long-term development. We are committed to:

- **User-Centric Development:** Prioritizing community feedback and ensuring that their needs guide product development and ecosystem expansion.
- **Reliability and Security:** Ensuring the security and resilience of the **BeeCoin** environment by utilizing reputable blockchain technologies and robust security measures.
- **Continuous Improvement:** **BeeCoin** is constantly evolving, with regular updates to enhance user experience, integrate new technologies, and optimize reward systems.

- **Sustainable Growth:** Our roadmap for sustainable long-term growth includes phased launches, strategic partnerships, and interactions with other projects within the blockchain ecosystem.

- **Transparent and Fair Tokenomics:** We are committed to a transparent and fair token distribution model that benefits both early participants and long-term users.

BeeCoin is dedicated to building an efficient ecosystem aligned with community interests and responsive to changes in the digital landscape.

Roadmap and Token Development

1. Official Launch of BeeCoin Bot

The **BeeCoin** project is officially introduced by the FQS team, and its dedicated bot is launched.

2. Collaboration with Influencers and Advertising

Increase awareness and attract new users through partnerships with reputable influencers and creating engaging advertising campaigns.

3. Expansion of Features and Bot Updates

4. Adding Diverse Games and Daily Cards

Launch new reward systems to increase user engagement.

Conduct in-bot lotteries with special prizes.

5. Leveraging the TON Blockchain

Integrate TON to enable fast and secure transactions, especially for in-bot payments.

6. Launching the Bet Section

Provide betting opportunities in games to create excitement and income generation.

7. Negotiating and Listing BeeCoin Token on Exchanges

Collaborate with reputable exchanges and plan for listing the **BeeCoin** token to access new markets.

8. FQS Token Airdrop for BeeCoin Users

Distribute FQS tokens to **BeeCoin** users as an incentive to increase participation.

9. Public and Private Pre-Sales of BeeCoin Token

Attract investment for the project through public and private pre-sales of the **BeeCoin** token.

10. Distributing Airdrops in BeeCoin Games

Award **BeeCoin** tokens to active users in games to encourage continuous engagement.

11. Listing BeeCoin Token on Reputable Exchanges and Information Platforms

12. Registering BeeCoin Token on CoinMarketCap and CoinGecko

Collaborate to provide users access to token information.

Implement staking opportunities for **BeeCoin** and FQS tokens within the bot to allow users to increase their asset value on the platform.

13. Introducing Bee World

Launch the digital world of bees with diverse activities and earning opportunities for users.

14. Integrating FQS and BeeCoin Programs

Synchronize services and features of both projects to enhance user experience and create a comprehensive ecosystem.

15. Launching a Dedicated DApp

Develop and launch a decentralized application (DApp) for **BeeCoin** to provide users easier access to services.

16. Collaborating with New Projects in the Crypto Ecosystem

Expand collaboration networks to increase adoption and use cases of **BeeCoin** across various domains.

17. Introducing Poker Games in BeeCoin

Add Poker games with the ability to earn valuable rewards.

18. Offering Exclusive NFTs for BeeCoin and FQS

Introduce special NFTs for users that provide added value within the ecosystem.

19. In-Network Payments and BeeCoin Payment Gateway

Create infrastructure for in-network payments and introduce a payment gateway to increase token usage.

20. Hosting Global Competitions in Bee World and Poker

Organize global competitions with special prizes to attract users worldwide.

21. Expanding BeeCoin and FQS Payment Gateways

Provide access to diverse payment gateways for broader token utilization.

22. Expanding BeeCoin to Other Blockchains

Develop **BeeCoin** and integrate it with various blockchains to increase stability and attract new users.

23. Token Buyback and Burning

Implement buyback and burning mechanisms to maintain value and reduce token supply in the market.

24. Allocating Revenue for Token Buyback

Allocate 20% of YouTube and social media revenues for the permanent buyback of FQS and **BeeCoin** tokens.

Allocate 40% of social media revenues for distribution among bot users.
